63 Cybersecurity Resources for Any Stage of Your Career

The field of cybersecurity is always evolving, and nothing suggests that that is likely to change soon. That's because hackers are constantly finding new ways to infiltrate systems. A degree or bootcamp will give you the foundational knowledge you'll need to launch your career, but cybersecurity professionals need to be constantly learning once they're out of school.

Sounding The Alarm On Emergency Alert System Flaws

The Department of Homeland Security (DHS) is urging states and localities to beef up security around proprietary devices that connect to the Emergency Alert System — a national public warning system used to deliver important emergency information, such as severe weather and AMBER alerts. The DHS warning came in advance of a workshop to be held this weekend at the DEFCON security conference in Las Vegas, where a security researcher is slated to demonstrate multiple weaknesses in the nationwide alert system.
